Our Services

Giving SME Business the Corporate Treatment

What We do!

Here at The Energy Supermarket! We are excited to offer a range of energy services that can help you save time, money, reduce your carbon footprint, and improve your overall energy efficiency. Our team of experienced professionals is committed to providing your business with the best possible service, and we are proud to offer a variety of options to fit your specific needs.

Our energy services include everything from energy audits to installation of energy-efficient equipment. We can help you identify areas where you may be wasting energy, and provide you with practical solutions to reduce your energy consumption.

We don't stop there! we aim to be your one stop shop service provider which is why we also help to reduce what you pay on your water and waste collection for the business!

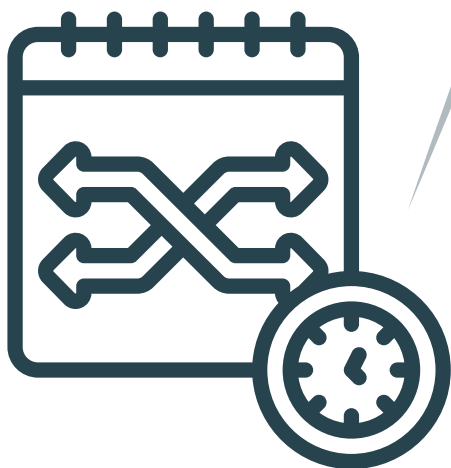

Energy Procurement

Fixed energy is a type of energy plan that allows you to lock in a set rate for your energy usage over a specific period of time. This means that you can avoid fluctuations in energy prices and have more predictable energy bills.

Fixed energy plans can be a great option for individuals and businesses who want to better manage their energy costs and budget. With fixed energy, you don't have to worry about sudden increases in energy prices, which can be especially helpful during times of high energy demand.

If you're interested in fixed energy, our team of professionals can help you find the right plan for your specific needs. We can provide you with information on different fixed energy plans, as well as help you understand the benefits and potential drawbacks of each plan.

VS

Flexible energy contracts are a great way for consumers to take control of their energy usage and support the use of renewable energy sources. With a flexible energy contract, consumers can choose when and how they use energy, based on the availability of renewable energy sources.

When you take out a flexible energy contract, our energy traders will purchase your gas or electricity directly from the wholesale commodity market – often securing lower rates. A flexible contract allows businesses to take advantage of an ever-changing energy market when fixed price contracts are too restrictive.

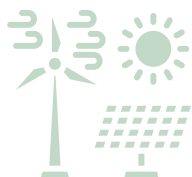

Flexible energy contracts allow consumers to take advantage of times when energy is cheaper, such as during off-peak hours. By using energy during these times, consumers can lower their energy costs while also supporting the use of renewable energy sources. This not only benefits the environment, but it also benefits consumers by helping them save money on their energy bills.

Energy Services

Account Management

One key strategy for effective energy account management is to regularly monitor your usage patterns. By tracking your energy consumption over time, you can identify areas where you are using more energy than necessary and take steps to reduce your usage. Always have one point of contact with any issues or queries you may have.

Renewable Energy

Renewable energy is becoming an increasingly popular option for many businesses looking to reduce their carbon footprint and lower their energy costs. By harnessing the power of natural resources like solar, wind, and geothermal energy, renewable energy sources offer a sustainable and environmentally-friendly alternative to traditional fossil fuels.

New Meter Connections

New meter connections can be a mine field to navigate as there are quite a few hoops to jump through to make sure it's done correctly and in a timely manor so that it has no hindrance on your day to day running of the business. The Energy Supermarket will take this stress away for you and make sure that your new meter is installed quickly and efficiently.

Energy Audits

Understanding where your business uses energy is important but it absolutely necessary to understand where your business is wasting energy and its important for us to understand this also, we will send one of our energy experts to your site to analyse all components using energy and give you a detailed report on your energy efficiency.

Reducing Carbon Footprint

It is difficult to decrease CO2 emissions because CO2 is a result of a wide variety of human activities, such as the burning of fossil fuels for electricity, transportation, and industry. The Energy Supermarket analyse how your business contributes toward CO2 emissions and look to put in cost effective strategies to help reduce them.

Bill and Contract Analysis

Budgets are important for any business and sticking to them is imperative so its important to know that the contract you are planning to sign or have signed will have no surprise charges. Its also important to understand that you are paying no unnecessary charges on your bills, we have saved customers thousands £'s in their current contracts simply by analysing their bills.

Transparency

Relationships are built on trust and here at The Energy Supermarket we value all of our customers and we want to hold onto them which is why from day 1 we have disclosed all commissions in our contracts, we work with a large panel of suppliers, ones that we know are reliable and provide our customers with the best service. If suppliers don't meet this criteria we do not work with them.

Market Tracking

Our team of experts tracks the market on a daily basis so you don't have to, this makes its easy for us to identify when the best time to buy is and when we expect to see price increases. Every customer decision has to be an educated one which is why we present all of the relevant information to help make the right decision.

Additional Services

Multi-site Management

Managing multiple sites can be a challenging task for any business. It requires a lot of time, effort, and resources to ensure that all locations are running smoothly and efficiently.

Here at The Energy Supermarket we aim to make managing multiple sites for their energy needs seamless and hassle free. We look to put all sites with one supplier and negotiate a common contract end date for all supplies giving you buying power in the market. Put all your sites in one location with The Energy Supermarket.

Our experts can talk you through the process and start your savings with immediate effect.

Waste Management

Choosing a waste management service can be a daunting task for a new or small business owner, so we want to take the worry out of waste and make it easy for you to choose The Energy Supermarket as your provider of choice.

Not a lot of business consumers know that they can now save money on their water contracts by moving to a new supplier.

Our experts can talk you through the process and start your savings with immediate effect.

Water Procurement

Following government deregulation in April 2017, companies in England can now select their own water supplier. In the same way that they can choose their energy supplier. Water has been deregulated in Scotland since 2008, but it remains regulated in both Wales and Northern Ireland.

Not a lot of business consumers know that they can now save money on their water contracts by moving to a new supplier.

Our experts can talk you through the process and start your savings with immediate effect.
